If you need to convert your SportsWare2007_Replica database to a main database, follow this procedure

1. Start SportsWare2007 and open your replica database. This will usually be C:\Program Files\SportsWare2007\Data\SportsWare2007_Replica.mdb.
2. Go to the **File** menu. Pick **Convert, Remove Replica**.
3. At this point, your database is no longer a replica database, but it is still named **SportsWare2007_Replica.mdb**. You will probably want to rename the file.
4. Close SportsWare. Use Windows Explorer, or My Computer to locate **SportsWare2007_Replica.mdb** and rename it. The default name for the SportsWare2007 main database is **SportsWare2007.mdb**.
5. Start SportsWare. You will get a message that SportsWare can no longer find your database. Click **OK**. You will be taken to a **Find Database** window. Open your newly renamed database.
