	Title:	Sportsware2004 Palm Installation Instructions	
	Document #:	300044	
	Rev:	A	Effective Date:

1 Overview

Welcome to the SportsWare2004 for Palm software. This document details the procedures to install and synchronize the SportsWare2004 for Palm version.

NOTE: *This procedure assumes you have already installed SportsWare2004 on your Desktop Computer.*

2 Supported Devices

- OS: PalmOS 3.5 and above Memory: 16Mb recommended.

3 Installing SportsWare on the Palm

3.1 Deleting Existing SportsWare Files from the Palm

You must delete all SportsWare files from your Palm before installing a new SportsWare version. To delete a file:

1. Click on the **Home** icon.
2. Click on the **Time** display.
3. From the **App** menu, click **Delete**.
4. Select the desired file and click the **Delete** button.
5. Repeat step 4 for each file you want to delete.

Delete the following files from the Palm. Note: Insure that these files have been deleted. Failure to do so could result in data corruption.

- Athlete
- Athlete_HDF
- Injury
- Injury_HDF
- Phone
- Phone_HDF
- Referral
- Referral_HDF
- Treatment
- Treatment_HDF
- Sportsware
- System

3.2 Installing the New SportsWare Program on the Palm

1. Start the Palm Install Tool on the Desktop Computer. **Start, Programs, Palm Desktop, Install Tool.**
2. Click the **Add** button.
3. Select the **C:\Program Files\SportsWare2004\ SportsWare.PRC** file.
4. Click the **Done** button.
5. **HotSync** your Palm and wait for the HotSync to complete.

6. On the Palm, click on the **SportsWare** icon  to initialize SportsWare.
7. After the SportsWare application start, exit SportsWare. Note: Synchronization will not work if the SportsWare program is open; the PDA will view the databases as busy and will not transfer the data.

3.3 Licensing the Palm Program

1. Start SportsWare on the Desktop Computer by clicking on the **SportsWare** icon.
2. From SportsWare, select **File, Add License, PDA**.
3. Select the **PDA names** you want to license
4. Click the **Generate** button and contact CSMI with the code to obtain your Palm license.

3.4 Sending Your Data to the Palm for the First Time

1. Select **File, Synchronize, PDA**.
2. Check the **Overwrite data on PDA** and the **Update Picklists on PDA** checkboxes.
***NOTE:** These boxes should only be selected the first time you send data to the new SportsWare application.*
3. Select the **Palm Username** for the Palm you will be sending data to from the pull-down list.
4. Click the **Synchronize** button. If you see a box popup asking for a HandBase license key, enter the value provided by CSMI.
5. SportsWare displays a message that you will over-write your existing Palm data. Click **OK** to continue.
6. A perform HotSync window appears. Press the button on the Palm cradle to perform the **HotSync**.
7. *After the HotSync is completed, click **OK**.*

4 Synchronizing SportsWare Data with the Palm

After installing SportsWare on your Palm, you will periodically synchronize the data. During the synchronize procedure, SportsWare takes the new information from your Palm and adds it to the Desktop database. SportsWare then generates a new copy of the desktop data for the Palm and sends it to the Palm.

1. Select **File, Synchronize, PDA**.
2. Select the **Palm Username** for the Palm you will be sending data to from the pull-down list.
3. Click the **Synchronize** button.
4. A perform HotSync window appears. Press the button on the Palm cradle to perform the **HotSync**. During this first HotSync, SportsWare reads the data from your Palm. After the HotSync is completed, click **OK**.
5. SportsWare then combines the data from the Palm with the Desktop data and generates a new database for the Palm. When the new Palm database is ready, SportsWare asks you to perform a second HotSync.
6. Press the button on the Palm cradle to perform the second **HotSync**. After the HotSync is completed, click **OK**.
7. The synchronization between the Desktop and Palm is now complete. If you have a second Palm, you can synchronize it now by selecting the second Palm Username and

repeating the above steps, otherwise click the **Exit** button to close the Synchronization window.
