

Moving SportsWare to a New Computer

1. Background.

- 1.1. These instructions are used for moving your SportsWare program and database from one stand-alone computer to another. After this procedure SportsWare will only be run on the second computer.
- 1.2. If both computers are on a network, you should place the database on a server which allows you to access the database from both computers simultaneously.
- 1.3. If you want to work on both computers but they are not connected, you should use the **File, Synchronize, Laptop** command.

2. Backup your database.

- 2.1. From the current computer, open SportsWare.
- 2.2. From the **File** menu, select **Backup**.
- 2.3. Click the **Browse** button to set the destination for the backup file (zip drive, USB Key, etc...).

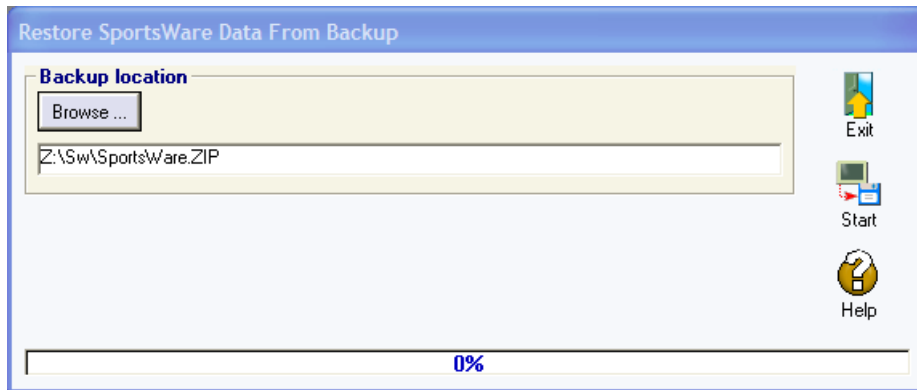

- 2.4. Click the **Start** button. This will create a backup of your current database.

3. Install SportsWare on the new computer.

- 3.1. Download and install SportsWare on the new computer. You can download SportsWare from http://csmisolutions.com/cmt/publish/service_software_dl.shtml.
- 3.2. Open SportsWare, you will be prompted for new activation numbers.
- 3.3. Follow the instructions for activating SportsWare.

4. Restoring your SportsWare database.

- 4.1. From the **File** menu select **Restore**.
- 4.2. Click the **Browse** button to set the source of your backup file.

- 4.3. Click the **Start** button to restore your SportsWare database. **Note:** *This will over-write the existing SportsWare database with the Backup database.*
